

COAT YOUR BAKING TRAYS.

Using coatings from Anneliese will save you cash and help the environment.

- + No more release agent costs
- + Far easier cleaning
- + Reduced production time
- + Perfect baking results

TOP COAT NOVA

- 2-layer PFA/PTFE system
- operation temp. -30/260°C
- high abrasion resistance under mechanical stress

Application area: For dough and buns in craft bakery.

TOP COAT RED

- 4-layer PFA system
- operation temp. -30/260°C
- extended lifetime due to increased layer thickness and ceramic reinforcement

Application area: Extreme applications like automatic tin-set lines, tin-sets for rye bread, lye roll and sourdough products

TOP COAT SPEZIAL

- 2-layer PFA/PTFE system
- operation temp. -30/260°C
- high abrasion resistance due to ceramic reinforcement

Application area: Trays in automatic baking lines, applications with high mechanical stress level

TOP COAT EXTRA (+) *

- 2 (3)-layer PFA system
- operation temp. -30/260°C
- outstanding non-stick properties

Application area: Automatic tin-set lines, automatic baguette & bun lines as well as special applications

*In brackets, the values for Top Coat Extra Plus
